

ELIZA

Industrial Heavy Duty Full Automatic Washer Extractor

Imported Bearing

Imported Fluorine
Rubber Oil Seal

Separated Bearing System

**Max. Extracting Speed
890RPM, 600G
World No. 1!**

Product Advantages:

- 1.This industrial automatic washing extracting machine is designed according to international standard.
- 2.The new generation separated type shaft seat system thoroughly solves water leakage issue and guarantees the normal service life of the equipment.
- 3.Variable rigidity spring and hydraulic damper suspension structure can absorb vibration by 99.9% and anti-eccentric load ability is as high as 45%. It offers great stability and decrease the abrasion between parts.
- 4.Shaft system is easy to maintain.
- 5.Touch type LCD computer control panel allows easy operation of the machine. To assure uninterrupted production, a spare computer control system is provided.
- 6.No corrosion drain valve prevents connecting rod from sinking into water in order to assure the service life of cylinder sealers.
- 7.Full automatic detergent feeding system, with feeding quantity being adjustable.
