

ELIZA

Innovation is the core guideline of Shanghai Eliza.

Shanghai Eliza is the first company that developed the industrial heavy duty washing machine with 25 degrees tilt at both ends and 20 second automatic loading and unloading.

Shanghai Eliza is the first company that developed the high efficiency high energy saving dryer with full close front tilt, 20 second automatic unloading and U type 270 degrees wind tunnel.

Aiming at large scale central washing factory, Shanghai Eliza has developed Eliza Green System (EGS). The standard line of EGS can wash and dry 4320kg/hour with only 3 workers, increasing production by 100%, saving water cost by 30%, saving labor by 90% and saving energy by 50%.

Our products are widely used in big hotels, hospitals, big pharmaceutical factories, mine companies, big central washing factories and laundries.

Our products are already exported to Europe, USA, Middle East, Southeast Asia and Africa, etc. Our products have won great remarks from end users with its high quality and high performance.

We would like to assist you to achieve success in your business with our better quality equipment, better price and professional service.
