

Product Advantages:

- 1.It can control textile sending speed and has correct positioning. It can correctly measure textile length and calculate folding length.
- 2.Big screen LCD is adopted. It has fault self-detection and can show alarm.
- 3.It has 2 sets independent driving motor. The folding speed is steplessly variable by converter within 50m/min.
- 4.It can match with various types of ironing machines.
- 5.The highly intelligent PLC and the touch screen are highly reliable, long in service life and offer convenient operation and error finding.
- 6.Intelligent infrared ray checking system can measure speed and increase folding accuracy.
- 7.It can judge if folding is qualified or not to assure folding quality.
- 8.It has a complete self-checking and safety protection system, which facilitates daily maintenance.
- 9.It has anti-static function, thoroughly solving textile' s warping and wrinkling.
- 10.The only five knife folding mechanism is unique in the industry.
- 11.It can fold 4 pillowcases at once (optional).

Technical Parameters(Power Source Voltage 380V)

Model	ZD3000	ZD3300
Folding Channel(mm)	1	1
Folding Layer/Time	5	5
Folding Length(mm)	3000	3300
Max Speed(m/min)	50	50
Compressed Air Pressure(mpa)	0.6	0.6
Compressed Consumption(l/min)	40	40
Total Power(kw)	2.25	2.25
Power Voltage(v)	380	380
Outside Dimensions(mm)	4150x2700x1800	4500x2700x1800
Machine Weight(kg)	1900	2100
