Multi-Roller High Speed Ironing Machine With Pressing Function

LPG Infrared Light Direct Burning
Energy Use Rate 99.99%

Product Advantages:

1. This heating and smoothing machine is driven by VF converter, which offers small shock starting current, smooth acceleration and economic energy consumption.
2. Automatic tensioning function can assure smooth textile feeding so that textile is flat.
3. The roller is 800mm in diameter and has a thickness of 4mm. It is made of SUS304 stainless steel.
