

## Product Advantages

- 1.Unique extra-size constant temperature heater. It gives higher temperature than ordinary heater and can cut down drying time and increase efficiency.
- 2.Specially designed 270 degrees U type hot air tunnel is 50% of the 180 degree type in heating time. So within the same time, U type can take away more moisture.
- 3.Extra size wind wheel and high density hole net allow more hot air to heat the textile, saving drying time by 1/3 and saving energy by 40%.
- 4.Extra size fine hair filter reduces wind resistance and cuts down drying time. The computer can accurately control temperature. The cold wind compensation function can offer low temperature drying of soft textiles like silk.
- 5.It is convenient to clean the fine net from middle.

## Technical Parameters(Power Source Voltage 380V)

Model	HG-70	HG-120
Rated Drying Capacity(kg)	70	120
Electric Heater Power(kw)	40 (optional)	/
Blower Power(kw)	2.2	5.5
Main Motor Power(kw)	2.2	2.2
Rated Voltage(v)	380	380
Steam Pressure(mpa)	0.4	0.4
Outside Dimensions(mm)	1650x1680x2100	2000x2150x2650
Machine Weight(kg)	1640	2050
Gas Heating	Optional (gas consumption:4cbm/cycle)	Optional (gas consumption:7m3/cycle)

## Flatwork Double Side Smoothing And Automatic Feeding Machine
